EXECUTIVE SUMMARY

Founder with a track record of building 0→1 products from idea to millions of users. Previously, was a Meta engineer selected for the company's highest-leverage new product initiatives before co-founding four consumer AI products under one venture backed company. This past year, I transitioned from CTO of the company to the solo founder and CEO leading company strategy, product, engineering, design, and hiring.

EXPERIENCE

Founder & CEO | Discz Music Inc. 2021 - present

Housewarming: AI social networking app

- App reached #22 in social networking, connecting friends over casual daily moments
- Introduced a new consumer AI paradigm with social context centered on relationship intelligence, enabling proactive reminders, personalized recommendations, and AI-to-AI coordination for social planning

Verse: AI creative expression app

- App reached #2 in design, empowering creative expression through design on a freeform mobile canvas
- Introduced "Internet Bedroom" as a campaign for the app, reaching over 20 million people globally
- Featured in TechCrunch, Billboard, The Tab and more

Discz: AI music discovery and sharing app

- App reached #1 in music in 10+ countries, 1.5M+ downloads and 40K+ App Store reviews
- Recognized by Rolling Stone as the music industry's 'hottest recommendation tool' and was picked as TechCrunch's favorite company of YC Winter 22 batch, and landed us on Forbes 30 under 30 in consumer tech

Senior Software Engineer | Meta 2018-2021

- Led product and iOS engineering for WhatsApp Pay launches across Mexico and Indonesia, owning the end-to-end experience for new markets.
- Joined Meta's New Product Experimentation (NPE) incubator to build new social products from scratch; helped launch Tuned, the most widely adopted consumer app to emerge from NPE.
